

Program overview

Utah is one of the gems of the southwest. CORE academy has partnered with three different National Parks to provide you with work experience and project based learning in each of these parks. By being a part of an Academy, you have been granted privileges to visit job sites, mentors, internships, visit local universities. We feel it is important to offer every opportunity to you that will help you build skills toward a life after high school. This is the ultimate place to do just that!

Camping, hiking, star gazing.....

There are places in Utah that are so breathtaking that they do not seem real. After you blink and take a breath full of fresh air you realize that you are completely surrounded by beauty that cannot be captured in a picture, it has to be experienced.... and you are here.

You and your friends have rented bikes in the afternoon and are cruising on the trails. Then you stop at the Zion lodge to get some soft serve and rest under a 100-year-old oak tree.

It is to bed early tonight because tomorrow you are headed out on hikes in the valley of Bryce Canyon or cool down next to the Weeping Rock in Zion National Park. You will never look at the night sky the same after a Star Party in Cedar Breaks National Monument. Three national parks, one state park, CORE camp is the place to understand why it is so incredibly important to preserve our natural resources.

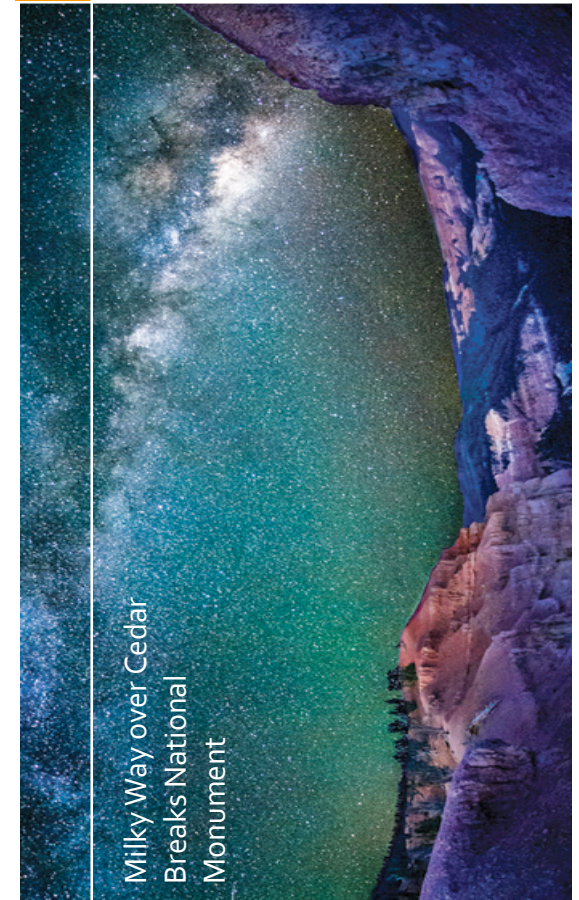

CORE Camping Trip

Zion National Park, Bryce Canyon National Park
Cedar Breaks National Monument

Summer Internship: Utah National Parks

Job Skills, Community
Service and lifelong
memories

Milky Way over Cedar
Breaks National
Monument

Internship

As a part of a California Partnership Academy your high school experience is much more than classroom work. In the CORE Academy teachers work with industry partners to train you with marketable skills so that you have a skill set when you exit high school. You will have the opportunity to partake in a Federal invasive plant study that will provide you experience with Geographical Information System (GIS) as well as identification of invasive and native plants to the Southwest.

Navajo Trail, Bryce Canyon Nat'l Park

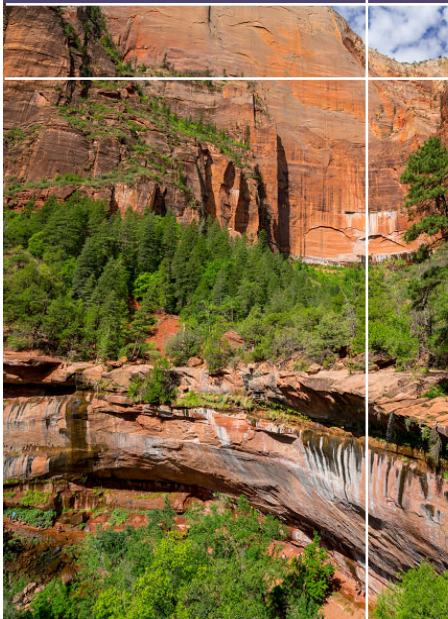

Camp Applications are due BEFORE you leave for spring break!!
