

ECOLOGY WORD SPLASH

Your instructions are to compose a paragraph(s) using all of the words below. DO NOT just string them together in one big run-on sentence! You need to use proper grammar. You may **NOT** look up the words in your book. If you don't know the definitions, just use your best judgment. Write your paragraph above the line! Then at the end of the Unit rewrite (below line) the paragraph(s) with your understanding of the words!

Ecology
Habitat

Natural Resource

Abiotic Factor

Biotic Factor

Carrying Capacity

Population

Niche

Community

Species

Mutualism

Natural Selection

Food Chain

Water Cycle
